# Wi-Fi Requirements

## Supported Devices

Our network supports most modern laptops, smartphones, tablets, and other Wi-Fi–capable devices.

## Recommended Hardware

For the most reliable performance – especially in areas with high signal congestion or heavy device use – we recommend using a **Wi-Fi 6 (802.11ax)** adapter.

For desktop computers, adapters that include a **desktop cradle and larger antenna** tend to provide:

- Better signal reception when placed away from the computer or under a desk
- Improved stability and speed in dense wireless environments
- Fewer dropouts and better performance during peak usage

The Netgear Nighthawk A8000 and TP-Link Archer TXE50UH are both good examples of a device that should work well in most situations.
